

KEHINDE BALOGUN

SOFTWARE DEVELOPER | FRONTEND AND FULL-STACK DEVELOPMENT

Lagos, Nigeria | +234 810 382 3867

balogunkehinde3@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software developer with more than three years of experience building and deploying web and mobile applications using React, Next.js, React Native, TypeScript, Node.js, and PostgreSQL. Experienced in full-stack development, API integration, authentication, real-time features, automated testing, content management, and production deployment. Active in developer communities through Global Hack Week, Hacktoberfest, technical writing, and volunteer software development.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS

Frontend: React, Next.js, React Native with Expo, Tailwind CSS, Redux Toolkit, TanStack Query

Backend: Node.js, Express.js, Next.js APIs, REST APIs, Server-Sent Events, webhooks, authentication

Data: PostgreSQL, Prisma ORM, MongoDB, Firebase, Supabase

Testing and Tools: Vitest, Jest, React Testing Library, Playwright, Git, GitHub, Vercel, Netlify, Omni CMS

PROFESSIONAL EXPERIENCE

Frontend Web Developer - StarMark

April 2026 - Present | Remote

Florida Atlantic University Website Migration Project

- Migrated more than 500 webpages from Florida Atlantic University's legacy website into its redesigned website using Omni CMS.
- Organized pages according to the new site architecture and content migration plan while transferring core content and images without legacy styles or code.
- Applied reusable website components and reviewed page names, links, image paths, formatting, and component usage for consistency and accuracy.
- Published completed pages to a testing environment and resolved migration issues involving invalid folder names, broken paths, outdated links, and inconsistent structures.

Volunteer Software Developer - STEM for Others (STEMpire LMS)

January 2025 - Present | Remote

- Develop interactive learning modules and assessments using React for an educational platform serving underprivileged students.
- Collaborate remotely through Git and GitHub while contributing to responsive, maintainable, and scalable user-facing learning experiences.

SELECTED PROJECTS

ParcelTrack | *Next.js, TypeScript, PostgreSQL, Prisma ORM, Better Auth, Vitest*

[Live Demo](#) | [GitHub Repository](#)

- Built and deployed a shipment-tracking platform with secure public tracking links and protected administrative package management.
- Implemented role-based authentication, immutable tracking histories, database transactions, carrier synchronization, signed webhooks, rate limiting, and privacy-safe public APIs.
- Developed more than 100 automated tests covering authentication, administrative workflows, carrier integration, and webhook processing.

SELECTED PROJECTS - CONTINUED

PulseVote | *Next.js, TypeScript, PostgreSQL, Prisma ORM, Redux Toolkit, SSE*

[Live Demo](#) | [GitHub Repository](#)

- Built a full-stack polling platform that lets users create polls, vote, and view continuously updated results.
- Implemented real-time result delivery with Server-Sent Events and guest participation with locally generated identifiers.
- Designed database models and API routes for polls, options, and votes, with validation and duplicate-vote protection.

AI Journal App | *React Native, Expo, TypeScript, Supabase, Node.js, Express.js, Anthropic API*

[GitHub Repository](#)

- Built a full-stack mobile journaling application that generates mood analysis, personal insights, and weekly summaries from journal entries.
- Developed authentication and data storage with Supabase and a Node.js and Express.js backend for AI processing.
- Implemented offline detection, haptic feedback, mood visualizations, input validation, and privacy-conscious handling of journal content.

DEVELOPER COMMUNITY AND OPEN SOURCE

Participant - Global Hack Week: Agents - Major League Hacking

August 2026 | Remote

- Participated in hands-on workshops focused on browser automation, debugging, Playwright, Chrome, artificial intelligence, and Model Context Protocol workflows.
- Continued studying the workshop projects through repository analysis and small browser-automation exercises.

Contributor - Hacktoberfest

2024 | Remote

- Completed four or more pull requests while practising GitHub contribution workflows, issue requirements, and collaboration with project maintainers.

EDUCATION

Bachelor of Science in Computer Science - Ladoke Akintola University of Technology

November 2021 – September 2024

National Diploma in Computer Engineering - D.S. Adegbenro ICT Polytechnic

2014 - 2016

CERTIFICATIONS AND TRAINING

- Front-End Engineering - AltSchool Africa
- Front-End Web Pro-Development - ALX Africa
- Back-End Engineering - ALX Africa
- Professional Foundations - ALX Africa
- Claude 101 and Claude Code in Action - Anthropic
